<sup>6</sup> Receipts and public debt retirements for 1921 exclude \$4,842,066.45 written off the public debt Dec. 31, 1920. See footnote 2, table 29.

<sup>7</sup> Beginning with 1932, tonnage tax has been covered into Treasury as miscellaneous receipts included in "Other receipts."

<sup>8</sup> Figures for 1940-47 have been revised to give effect to present classification of receipts for Federal old-age and survivors insurance trust fund. See footnote 3, table 5.

<sup>9</sup> Title was changed pursuant to act of July 26, 1947. Figures for Department of the Army include expenditures of Department of the Air Force from funds made available prior to fiscal year 1949. Expenditures for Office of the Secretary of Defense are included in "All other".

<sup>10</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

<sup>11</sup> The practice of including statutory debt retirements in budget expenditures was discontinued effective with fiscal year 1948. Table 29 shows details of statutory debt retirements.

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$500,000.

<sup>1</sup> Expenditures exclude statutory debt retirements; and include net expenditures of Government corporations (wholly owned), etc., under appropriate classifications, instead of separately as in 1947 annual report.<sup>2</sup> Includes so-called voluntary returns.<sup>3</sup> Figures for 1940-47 have been revised in accordance with present classification of these items in daily Treasury statements. Reimbursements for those administrative expenses which are not paid directly from Federal old-age and survivors insurance trust fund (cost of collecting employment taxes, etc.) are now classified as trust fund expenditures rather than the former treatment as a deduction from trust fund receipts. Total budget receipts are increased by this revision since reimbursements for administrative expenditures are reflected in miscellaneous receipts. Net receipts are unaffected, however, since appropriation to Federal old-age and survivors insurance trust fund is now stated on a gross basis rather than net after reimbursement.<sup>4</sup> Effective September 1, 1946, expenditures of War Shipping Administration are included with expenditures of U. S. Maritime Commission.<sup>5</sup> Expenditures of Reconstruction Finance Corporation and affiliates for activities other than for national defense and related activities are included under "Other expenditures: Miscellaneous". National defense and related activities expenditures for 1948 are not segregated from other expenditures.<sup>6</sup> Beginning July 1, 1946, consists of expenditures for Office of Selective Service Records; beginning March 1948, expenditures for Office of Secretary of Defense are also included.<sup>7</sup> Comprises Department of Agriculture expenditures, except those for UNRRA, surplus property disposal, other national defense and related activities prior to July 1947; international finance and aid; and forest roads and trails, included under "Public works", in this table.<sup>8</sup> Comprises budget expenditures under Social Security, Railroad Retirement, and Railroad Unemployment Insurance Acts. Refunds of taxes collected under provisions of these acts are included in "Refunds of taxes and duties" above.<sup>9</sup> Comprises expenditures of Federal Works Agency except those for surplus property disposal, other national defense and related activities prior to July 1947, and assistance to Greece and Turkey. Includes also forest roads and trails, rivers and harbors and flood control, reclamation projects, and Tennessee Valley Authority.<sup>10</sup> Comprises expenditures of Civil Works Administration, Work Projects Administration, National Youth Administration, and Civilian Conservation Corps.<sup>11</sup> Includes expenditures for executive departments not included elsewhere and for legislative and judicial functions; Government contributions to Federal employees' retirement; Civil Aeronautics; Panama Canal, except war expenditures; Post Office deficiency; and other miscellaneous.<sup>12</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.<sup>13</sup> Includes expenditures of Department of the Air Force for 1948.

NOTE.—Figures are rounded and will not necessarily add to totals.

\* Less than \$500,000.

<sup>1</sup> Figures have been revised in accordance with classifications in daily Treasury statement beginning Dec. 1, 1947. Reimbursements for those administrative expenses which are not paid directly from Federal old-age and survivors insurance trust fund (cost of collecting employment taxes, etc.) are now classified as trust fund expenditures rather than the former treatment as deductions from trust fund receipts.

<sup>2</sup> Consists of Alaska Railroad, Canal Zone, civil service, and foreign service retirement funds.

<sup>3</sup> Section 114 (f) of Economic Cooperation Act of 1948, approved April 3, 1948, required that the sum of \$3,000,000,000 be transferred to a trust fund entitled "Foreign Economic Cooperation Trust Fund" and "considered as expended during the fiscal year 1948, for the purpose of reporting governmental expenditures." The effect of this is to charge the budget in the fiscal year 1948 for expenditures to be made in the fiscal year 1949, with consequent effect on the surplus or deficit of those years.

<sup>4</sup> Comprised District of Columbia, Indian tribal funds, insular possessions, increment resulting from reduction in weight of gold dollar, seigniorage on silver, etc.

<sup>5</sup> Revised, see footnote 1.

<sup>6</sup> Comprised District of Columbia, Indian tribal funds, expenditures chargeable against increment on gold, etc.

<sup>1</sup> Revised in accordance with Bureau of the Census estimated population for continental United States as of July 1.

<sup>2</sup> Figures for 1853 through 1885, are taken from "Statement of receipts and expenditures of the Government from 1855 to 1885 and principal of public debt from 1791 to 1885," compiled from the official records of the Register's office. From 1886 through 1919 figures are taken from the monthly debt statements and revised figures published in the annual reports of the Secretary of the Treasury. (See table 24, p. 507, in 1942 report). From 1920 to date, figures are taken from the Preliminary Statement of the Public Debt published in the daily Treasury statements.

<sup>3</sup> Exclusive of the bonds issued to the Pacific railways (provision having been made by law to secure the Treasury against both principal and interest) and the Navy pension fund (which was in no sense a debt, the principal being the property of the United States).

<sup>4</sup> Includes old demand notes; United States notes (gold reserve deducted since 1900); postal currency and fractional currency less the amounts officially estimated to have been destroyed; deposits held by the Treasury for the retirement of Federal Reserve Bank notes, and for national bank notes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 were not included in the published debt statements; and also special notes of U. S. issued to International Bank for Reconstruction and Development and International Monetary Fund. Does not include gold, silver, or currency certificates, or Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.

<sup>2</sup> Sales of these stamps commenced May 1, 1941, as a special defense series of postal savings stamps, which were obligations of Postal Savings System. Beginning Oct. 1, 1942, this special series was replaced by a Treasury issue of United States war savings stamps, and all outstanding stamps became public debt obligations.

#### TAX EXEMPTIONS:

\* Any income derived from Treasury bills, whether interest or gain from their sale or other disposition, does not have any exemption, as such, and loss from the sale or other disposition of any such bills does not have any special treatment, as such, under the Internal Revenue Code or laws amendatory or supplementary thereto. Bills are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. For purposes of taxation the amount of discount at which bills are originally sold by the United States is to be considered to be interest.

\* Income derived from these securities is subject to all Federal taxes now or hereafter imposed. Securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority. The following is applicable to savings bonds only: For purposes of taxation, any increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.

\* Exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds authorized by the act approved Sept. 24, 1917, as amended, the principal of which does not exceed in the aggregate \$5,000 owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above. The following is applicable to savings bonds only: For purposes of determining taxes and tax exemptions the increment in value of savings bonds represented by the difference between the price paid and the redemption value received (whether at or before maturity) shall be considered as interest.

\* Exempt from the payment of all taxes or duties of the United States, as well as from all taxation in any form by or under State, municipal, or local authority. (The Supreme Court has held that this exemption does not extend to estate or inheritance taxes imposed by Federal or State authority.)

\* Interest on these bonds is subject to all Federal taxes now or hereafter imposed. Principal is exempt from taxation.

\* These issues, being investments of various Government funds and payable only for the account of such funds, have no present tax liability.

**In hands of foreign holders—Applicable only to securities issued prior to Mar. 1, 1941:** Bonds, notes, and certificates of indebtedness of the United States, shall, while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, not engaged in business in the United States, be exempt, both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority.

NOTE.—Figures are rounded and will not necessarily add to totals. Details by months from May 1941 for Series E, F, and G bonds (and from May 1935 for Series A–D bonds) will be found in 1943 annual report, p. 604, and in corresponding tables in subsequent reports. Series A–D sales and redemptions during 1948 will be found in table 33 of this report.

\* Less than \$50,000.

<sup>1</sup> Includes sales of F and G bonds to commercial banks. During calendar year 1940 commercial banks were permitted to purchase limited amounts of Series F and G bonds for investment of savings deposits (for details as to limitations, see pp. 44 and 47 of 1944 annual report); and they were again permitted to make such purchases from June 18 through June 30, 1945 (see pp. 50 and 51 of 1945 annual report), and from Dec. 3 through Dec. 8, 1945 (see p. 38 of 1946 annual report).

<sup>2</sup> Beginning with June 1947, Series E sales include small amounts of unclassified sales consisting of Series E, F, and G. These amounts are substantially less than sales re-

ported as unclassified in daily Treasury statement. The greater part of that item consists of sales for which information is available as to series but not year of issue. On basis of that information such sales are included in this table according to series. Prior to June 1947 it was possible to distribute by series all sales reported as unclassified in daily Treasury statement.

<sup>3</sup> Series E redemptions include small amounts of unclassified Series A–D redemptions beginning with October 1944, and small amounts also of unclassified Series F and G redemptions beginning with June 1947.

<sup>4</sup> Estimated, except for Series G.

<sup>5</sup> Estimated. Figures represent increment in value.

<sup>6</sup> Amounts outstanding are at current redemption values, except Series G bonds which are stated at par. Unclassified bonds shown in daily Treasury statement have been classified by series in this table.

NOTE.—Figures are rounded and will not necessarily add to totals. Sales from May 1941 through June 1946, by months, fiscal years, and calendar years, will be found in 1943 annual report, pp. 614 and 618, and in corresponding tables in subsequent reports. Redemptions, by months, during 1946, calendar year 1945, and fiscal year 1946 will be found in 1946 annual report, p. 532. Sales and redemptions, by months, for subsequent periods may be found at intervals in *Treasury Bulletin*. Data on redemptions by States are not available prior to October 1944.

<sup>1</sup> State redemption figures are not necessarily comparable with State sales data, inasmuch as bonds which have been purchased in one State may have been redeemed in another. Moreover, redemptions in this table are based on current redemption values, whereas sales are shown at issue price.

<sup>2</sup> Includes sales through March 1947.

<sup>3</sup> State figures exclude sales of Series F and G bonds to commercial banks. Commercial banks were permitted to purchase these bonds under certain conditions (see footnote 1, table 34).

<sup>1</sup> For monthly data back to June 30, 1916, see annual reports for 1929, p. 509; for 1936, p. 442; and corresponding tables in subsequent reports.<sup>2</sup> Interest-bearing debt includes discount on Treasury bills from June 30, 1930, the amount being deducted from interest-bearing debt before calculation of average interest rate. Savings bonds of Series A–F are included in interest-bearing debt at their current redemption value from March 1935. Treasury tax and savings notes, beginning August 1941, are included at face amount. Face value of savings bonds and tax and savings notes of any yearly series maturing from month to month which are not currently presented for retirement is shown as interest-bearing debt until all bonds or notes of yearly series have matured. Thereafter, total amount outstanding is shown as matured debt upon which interest has ceased. In computing average rate of interest, the rates used for both savings bonds and tax and savings notes are based upon annual yield on such obligations if held to maturity.

<sup>1</sup> For bonds selling above par and callable at par before maturity, the yields are computed on the basis of redemption at first call date; while for bonds selling below par, yields are computed to maturity. Monthly averages are averages of daily figures. Each daily figure is an unweighted average of the yields of the individual issues. Prior to Sept. 1941, yields were computed on the basis of the day's closing price on the New York Stock Exchange except that on days when an issue did not sell the yield was computed on the mean of closing bid and ask quotations on the Stock Exchange. Commencing Sept. 1941, yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market. For average yields by months from January 1919 through December 1929, see p. 662 of the annual report for 1943.

<sup>2</sup> From July 17, 1928, through Nov. 29, 1935, yields are based on all outstanding partially tax-exempt Treasury bonds neither due nor callable for 12 years; from Nov. 30, 1935, through Dec. 14, 1945, yields are based on all outstanding partially tax-exempt Treasury bonds neither due nor callable for 15 years. This index was discontinued as of Dec. 15, 1945, because there were no longer any bonds of this classification due or callable in 15 or more years.

<sup>3</sup> Average of all taxable Treasury bonds neither due nor callable for 15 years. Taxable bonds are those on which the interest is subject to both the normal and surtax rates of the Federal income tax. This average commenced Oct. 20, 1941.

NOTE.—For a description of security held, see footnote 2, table 81. Rounded figures will not necessarily add to totals.

<sup>1</sup> Revised.

<sup>1</sup> Money in circulation includes any paper currency held outside continental limits of United States.

<sup>2</sup> Based on Bureau of the Census estimated population for continental United States as of July 1 of each year.

<sup>3</sup> Does not include gold other than that held by Treasury.

Excluded from total stock, since gold or silver held as security against gold and silver certificates and Treasury notes of 1890 is included under gold, standard silver dollars, and silver bullion, respectively.

<sup>4</sup> Excluded from total in Treasury (see footnote 4).

<sup>5</sup> Includes credits with Treasurer of the United States payable in gold certificates in (1) gold certificate fund—Board of Governors, Federal Reserve System, in amount of \$16,513,733,547, and (2) redemption fund for Federal Reserve notes in amount of \$709,924,022.

<sup>6</sup> Includes \$170,000,000 lawful money deposited as reserve for Postal Savings deposits.

<sup>7</sup> The amount of gold and silver certificates and Treasury notes of 1890 should be deducted from this amount before combining with total money held in Treasury to arrive at stock of money in United States (see footnote 4).

NOTE.—Rounded figures will not necessarily add to totals.

<sup>1</sup> Revised.

<sup>2</sup> Figures differ slightly from monthly circulation statements for following reasons: (a) Beginning June 30, 1922, form of circulation statement was revised so as to include in holdings of Federal Reserve Banks and agents, and hence in stock of money, gold bullion and foreign gold coin held by Federal Reserve Banks and agents, and to include in holdings of Federal Reserve Banks and agents, and hence exclude from money in circulation, all forms of money held by Federal Reserve Banks and agents, whether as reserve against Federal Reserve notes or otherwise. For sake of comparableness, figures in this table for earlier years include these changes. For full explanation of this revision, see 1922 annual report, p. 433. (b) The form of circulation statement was revised again beginning Dec. 31, 1927, so as to exclude earmarked gold coin from stock of money, and hence from money in circulation; to include in holdings of Federal Reserve Banks and agents, and hence in stock of money, gold held abroad for account of Federal Reserve Banks; and to include in all categories, minor coin (1-cent piece and 5-cent piece). Beginning Dec. 31, 1927, circulation statement is dated for end of month instead of beginning of succeeding month, as was practice theretofore, and figures on revised basis for "Money held in the Treasury" are used. For sake of comparableness, figures in this table for earlier years

include these changes. For full explanation of this revision, see 1928 annual report, pp. 70-71. For figures for all years from 1880 through 1934, see 1947 annual report, pp. 478-481. Changes, minor in amount, are made in some figures in the June 30 circulation statements for use in these annual report tables.

<sup>3</sup> Excludes gold and silver certificates and Treasury notes of 1890 outside Treasury. Beginning with 1934, excludes amount (gold certificates) held for Federal Reserve Banks and agents. These items are excluded since gold and silver held as security against them are included. Composition of the stock of money is shown in table 81.

<sup>4</sup> From 1934 to date, amount (gold certificates) held for Federal Reserve Banks and agents is excluded from total money in Treasury, see footnote 2.

<sup>5</sup> Composition of money in circulation is shown in table 82.

<sup>6</sup> Based on Bureau of Census estimated population for continental United States as of July 1 of each year.

<sup>7</sup> On February 26, 1947, gold in amount of \$1,800,000,000 held for account of exchange stabilization fund was used as follows: (1) \$687,500,000.11 was paid to International Monetary Fund; (2) \$275,224,999.89 was transferred to gold certificate fund, Board of Governors, Federal Reserve System; and (3) \$837,275,000 was transferred to general fund of Treasury (and remains in this column).

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> See footnote 1, table 80. For figures for all years from 1860 through 1934, see 1947 annual report, pp. 482-484.<sup>2</sup> Part of gold and silver included in stock of money is held as reserve against other kinds of money, as follows: (1) As reserve for United States notes and Treasury notes of 1890—gold bullion (gold coin and bullion prior to gold conservation actions of 1933 and 1934) varying in amount from \$150,000,000 to \$156,039,431 during years included in this table; (2) also as security for Treasury notes of 1890 (these notes are being canceled and retired on receipt)—an equal dollar amount in standard silver dollars; (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of monetary value equal to face amount of such silver certificates; and (4) as security for gold certificates—gold bullion (gold coin and bullion before gold actions of 1933 and 1934) of value at legal standard equal to face amount of such gold certificates. Federal Reserve notes are secured by deposit by Federal Reserve Banks with Federal Reserve agents of like amount of gold certificates (gold prior to actions of 1933 and 1934) or of gold certificates and such discounted or purchased paper as are eligible under terms of Federal Reserve Act, as amended, or (from Feb. 27, 1932) of direct obligations of United States. Federal

Reserve Banks must maintain reserves in gold certificates (gold for 1933 and prior years) of at least 25 percent (40 percent prior to passage of act of June 12, 1945) including redemption fund which must be deposited with Treasurer of United States, against Federal Reserve notes in actual circulation ("Gold certificates" as herein used for 1934 and subsequent years include credits with Treasurer of United States payable in gold certificates). Federal Reserve notes are obligations of United States and first lien on all assets of issuing Federal Reserve Bank. Federal Reserve Bank notes at time of issuance were secured by direct obligations of United States or commercial paper; however, lawful money has been deposited with Treasurer of United States for their redemption and they are in process of retirement. National bank notes at issuance were secured by direct obligations of United States; lawful money has been deposited with Treasurer for their redemption and they are being retired.

<sup>3</sup> Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 have been excluded, however, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

<sup>1</sup> Customs receipts, on basis of reports of collecting officers, are credited to districts in which collections are made. Receipts in the various districts do not indicate the tax burden of the respective districts, since taxes may be eventually borne by persons in other districts. Customs duties and sale of insular government property for Puerto Rico (\$3,278,706) are deposited to credit of Government of Puerto Rico.

NOTE.—Dollar figures are rounded and will not necessarily add to totals.

<sup>1</sup> Amount of customs duties is calculated on basis of reports of Bureau of the Census, showing quantity and value of merchandise imported. Total estimated duties and total value of dutiable imports will be found in table 84. For figures back to 1890 see annual reports for 1930, p. 525; 1932, p. 383; and corresponding tables in subsequent reports.<sup>2</sup> Taxes collected on dutiable commodities under revenue acts and Sugar Act of 1937 are included in appropriate schedules.

\* Less than \$50 million.

\* Revised.

<sup>1</sup> Figures represent par values with the following exceptions: (1) The holdings of commercial and mutual savings banks of securities of Federal instrumentalities not guaranteed by the United States and of State and local governments, Territories, and possessions are book values, (2) the holdings of these securities by individuals are residuals, and so deviate from par values in those cases where the figures for commercial and mutual savings banks are book values, (3) in the case of data which include United States savings bonds Series A-D, E, and F, the figures for these bonds represent current redemption values.

<sup>2</sup> Includes partnerships and personal trust accounts.

<sup>3</sup> Includes savings and loan associations, dealers and brokers, and investments of foreign balances in this country.

<sup>4</sup> Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.

<sup>5</sup> Data on daily Treasury statement basis. Since data exclude noninterest-bearing debt, they differ slightly from those in discussion of debt ownership. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by the Treasury, and transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in the statement published in the daily Treasury statement for the end of the fiscal year.

<sup>6</sup> Excludes obligations of the Philippine Islands after June 30, 1946.

<sup>1</sup> The "total amount outstanding" of securities of the several issuers differs from the gross indebtedness of these issuers in that the former excludes noninterest-bearing debt. The "total privately held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.

<sup>2</sup> In the case of data which include United States savings bonds, Series A-D, E, and F, the figures for these bonds represent current redemption values.

<sup>3</sup> On basis of daily Treasury statements. Excludes transactions in Commodity Credit Corporation demand obligations which had not been reported in time for inclusion in the statement published in the daily Treasury statement for the end of the fiscal year. Guaranteed securities consist of Commodity Credit Corporation notes, Home Owners' Loan Corporation bonds (including those guaranteed as to interest only), Reconstruction Finance Corporation notes, Tennessee Valley Authority bonds, Federal Public Housing Authority (formerly United States Housing Authority) notes, Federal Farm Mortgage Corporation bonds, and Federal Housing Administration debentures. Excludes stocks, interagency loans, and securities held by the Treasury.

<sup>4</sup> Includes Electric Home and Farm Authority notes, Federal intermediate credit bank debentures, Federal land bank bonds (both those issued by the individual banks and the consolidated series), Federal National Mortgage Association notes, home loan bank debentures, War Finance Corporation bonds (World War I), and joint stock land bank bonds. Excludes stocks and interagency loans.

<sup>5</sup> Securities the income from which is exempt from both the normal rates and surtax rates of the Federal income tax.

<sup>6</sup> Securities the income from which is exempt only from the normal rates of the Federal income tax. In the case of partially tax-exempt (1) Treasury bonds and (2) United States savings bonds, interest derived from \$5,000 aggregate principal amount owned by any one holder is exempt from the surtax rates as well as the normal rates of the Federal income tax.

<sup>7</sup> Securities the income from which is subject to both the normal rates and the surtax rates of the Federal income tax.

<sup>1</sup> Excess of credits (deduct).

<sup>2</sup> Details of income taxes other than withheld and miscellaneous internal revenue on collection basis with adjustment to daily Treasury statement basis; details of employment taxes on warrants-issued basis with adjustments to daily Treasury statement basis; details of miscellaneous receipts on warrants-issued basis adjusted to include reimbursement to general fund from Federal old-age and survivors insurance trust fund for administrative expenses with total adjusted to daily Treasury statement basis; customs and refunds of receipts on warrants-issued basis with adjustments to daily Treasury statement basis. Railroad Unemployment Insurance Act receipts on daily Treasury statement basis. Figures have been adjusted from those appearing in the daily Treasury statement (1) to show refunds of receipts as a deduction from receipts rather than as an expenditure, and (2) to exclude, from both receipts and expenditures, payments to the Treasury, principally by wholly owned Government corporations, for retirement of capital stock and for disposition of earnings.

<sup>3</sup> Includes collections under Vinson Act.

<sup>4</sup> Because of the time required for payments reported as tax collections toward the end of each month to clear through the banks and become available for expenditures on the daily Treasury statement basis, an adjustment from the collection basis to the daily Treasury statement basis is necessary. A positive adjustment indicates that during the given period more tax receipts on the daily Treasury statement basis have been received than are reported as collections, and a negative adjustment indicates the reverse situation. The adjustment for total income and excess profits taxes other than withheld is arbitrarily assigned to the individual income tax.

<sup>5</sup> Collections for credit to trust funds are not included.

<sup>6</sup> Includes collections from: Taxes on narcotics, taxes imposed under the National Firearms Act, and the tax on hydraulic mining, all of which are effective currently. In addition, includes collections from excise taxes repealed or suspended prior to and including the Revenue Act of 1945 (consisting primarily of rubber articles, electric signs, optical equipment, washing machines, vacuum cleaners, and manufacturers' tax on luggage); collections from the liquor, tobacco, matches, tires and tubes floor stocks taxes imposed by the Revenue Acts of 1941, 1942, and 1943; collections from the tax under the Bituminous Coal Act of 1937 which expired Aug. 24, 1943; collections from the unjust enrichment tax; collections from the capital stock tax repealed with respect to years ending after June 30, 1945; and collections from the use tax on motor vehicles and boats repealed by the Revenue Act of 1945 with respect to the period after June 30, 1946.

<sup>7</sup> Based on the scheduled increase from 1 percent to 1½ percent each on employers and employees effective Jan. 1, 1950 (Internal Revenue Code, sec. 1400 (2), as amended by Public Law 379, approved Aug. 6, 1947). The estimate also assumes change in the method of collection requiring, with certain exceptions, that tax payments be deposited in designated depositories in the first month following the month of liability. Under present regulations tax payments are due on the last day of the first month following the end of the quarter in which the liabilities accrued.

<sup>8</sup> These estimates assume that tax payments will be deposited in designated depositories in the first month following the month of liability.

<sup>9</sup> Represents transfers from unemployment insurance trust fund to provide for administrative expenses plus very small amounts of back taxes.

<sup>10</sup> Represents transfers from unemployment insurance trust fund to provide for administrative expenses together with current tax receipts.

<sup>11</sup> Deduct, result of adjustment of classification of prior years' receipts.

<sup>12</sup> Classified by organization unit as published in table 2 of the 1950 Budget document. The figures are based upon the Treasury's Combined Statement of Receipts, Expenditures, and Balances, and therefore differ from figures published in the daily Treasury statement.

<sup>13</sup> Excludes transfer in 1948 of \$3 billion to the Foreign Economic Cooperation trust fund pursuant to sec. 114 (f) of the Economic Cooperation Act of 1948. Budget expenditures estimated for 1949 include expenditures made out of the Foreign Economic Cooperation trust fund.

<sup>14</sup> Expenditures, except under proposed legislation, are shown under the various agencies to which funds are allocated.
